ORGAN Important sources of vitamins, minerals and antioxidants

≤5% ≤10% ≤20% ≤30%:

- Heart Kidney Liver Lung Spleen
- Reproductive organs (Uterus | Ovaries | Testes)
- Stomach (Raw Green Tripe | Gizzard)
- Trachea (Thyroid Gland)

BONE *Important source of calcium (and magnesium).
Muscle meat is high in phosphorus. **Note: Do not cook meals containing raw bones.**

This 100% pure raw meat meal has been designed to nourish your pet with species appropriate nutrients. It should be tailored to meet the needs of the individual cat or dog.

*Balancing Calcium and Phosphorus:

Rule of thumb: 1 heaping teaspoon of raw ground bone (bonemeal)

or (eggshell powder) for every pound(454g) of meat adequate for an adult animal.

Including ground bone at 1.5-2% the weight of the meat provides calcium in the diet in a balanced ratio to phosphorus. Raw bones fed at approximately 10% of the total diet will also provide this "balance."

Note: Pregnant, Nursing and Growing (puppies/kittens) animals have increased calorie and calcium needs. It's important growing get enough bone to grow their-own. 30% raw bone is a loose guideline.
