**FOR DOGS**

## BC'S BEST

Conscious Cuisine  
for Dogs and Cats

Grass-fed and/or Organic

### Local, Sustainable, Nourishing Whole Foods

BC's Best is a new, premium raw pet food that is built on the core values of pet health, local ingredients, sustainable agriculture and humane animal production standards.

#### "We are what we eat."

Beginning with man's best friend, our team has formulated recipes using modern nutritional science guided by ancient wisdom and basic biological truths. Our pets are healthiest when eating the foods they were designed to eat. Cats and dogs have lived for thousands of years on this planet eating mostly meat. They ate it RAW and it varied seasonally and day to day.

With this in mind, our **autumn/winter** and **spring/summer** product lines evolve around the fruits, vegetables and herbs that are seasonally available within BC.

Taking a holistic approach to health, BC's Best understands that living whole foods, with their natural enzymes intact, are full of nutrients that operate synergistically within the body to promote health and vitality throughout the lifetime of a pet.

Our team at BC's Best understands all pets are individuals and as such will have different nutritional needs throughout their lifetimes. While not advocating a strict meat-based raw diet for ALL dogs, we believe the integration of real whole foods into the diet of most pets will be extremely beneficial.

# Ingredients

**BC's Best** quality, human grade meats come from BC range-raised, grass-fed cattle and sheep, and Fraser Valley organic chicken and free run duck. All animals are processed at licensed craft abattoir facilities close to home that support humane animal production models and eliminate the unnecessary stress of long distance transport. **Each meal includes vitamin and mineral dense super foods chosen for their powerful antioxidants, anti-inflammatories and potent immune-enhancing and anti-cancer phytonutrients.** Freshness and variety is the essence of complete and balanced nutrition. Using whole foods to provide the full spectrum of both 'known' and yet-to-be-discovered nutrients, our formulations change with the seasons to mimic the variation that would be provided by a natural diet. Our intention is to restore and **revitalize the health of pets** through the provision of nourishing, whole species-appropriate foods produced in harmony within our local landscapes. *Our canine companions love it, we hope yours do too!*

# Ownership, Processing and Distribution

The shareholders of BC's Best include the farmers who supply the raw ingredients. We have partnered with **Rodear Meats Ltd.** from Big Lake, BC to process and package our product lines. The team at Rodear Meats Ltd. cares deeply about product quality, with a culture of food safety and attention to detail at every step. They have been processing locally produced meats for over 25 years with a solid foundation of experience and success.

## Planting Seeds of Change

The goal for BC's Best is to provide **nourishing whole foods for pets**, using the diversity of foods that grow in our beautiful province throughout the year to support a shift towards a **healthy, sustainable food system.**

*Lab Analysis and Feeding Recommendations are available on the website:*
